Mr. Seth Maitlen
TTM Technologies, Inc.
4 Old Monson Rd.
Stafford, CT, 06075

Dear Mr. Maitlen:

RE: Qualified Manufacturers List (QML) Certification, MIL-PRF-31032, CAGE Code 5L706;
CN064989, VQE-24-038891

An on-site recertification audit was performed on August 1 through August 3, 2023, of your facilities at 4 Old Monson Road, Stafford, CT to the requirements of MIL-PRF-31032 and your Technical Review Board (TRB) approved Quality Management (QM) Plan.

Compliance with these requirements has been successfully demonstrated. Therefore, TTM Technologies, Inc. (Stafford) is considered a certified manufacturer eligible to continue to qualify and supply printed boards to the requirements of MIL-PRF-31032. This certification covers the following:

Quality Management Plan: *QP-400 – MIL-PRF-31032 Quality Plan* (latest revision) and *QL4-400 - Technical Review Board Operating Procedure* (latest revision).

Process Flow Documentation Index: *Doc Hub Document Index maintained electronically through the TTM Technologies - Stafford document control system, outlined in QL4-431.W1 Control of Level II Quality System Procedure Work and QL4-431.W2 Control of Level III and Level IV Documents* (latest revisions).

Process Flow: *QL3-430 RD1 – Product Process Flow Chart* (latest revision).

This certification gives your TRB the responsibility and flexibility to approve major changes to the MIL-PRF-31032 certified process flow and QM plan with concurrent notification to the qualifying activity (DLA Land and Maritime-VQ), with the following exceptions:

1. Test optimization initiatives must be coordinated with DLA Land and Maritime prior to implementation.
2. Initial qualification actions initially must be coordinated with DLA Land and Maritime throughout the qualification process.

This recertification can only be terminated by written notification from this Center. For the duration of the certification, the manufacturer is subject to periodic reviews by the qualifying activity or its representatives. TTM Technologies - Stafford agrees to submit status reports in accordance with its TRB approved QM Plan and MIL-PRF-31032.

All qualification tests, lot conformance, and periodic conformance inspections shall be performed at facilities that have DLA Land and Maritime-VQ Laboratory Suitability Status for each of the applicable test methods.

Note: The results of the DLA Land and Maritime-VQE on-site audit held on August 1 through August 3, 2023, were found by examining a sampling of the manufacturer's normal manufacturing, testing, and processing procedures. The acceptance of the corrective actions from the above referenced sample audit does not relieve the manufacturer of its contractual obligation to deliver printed boards that comply with all applicable requirements. For questions concerning this letter, please contact Mr. Zachary Chen at (614) 692-9554 or vqe.zc@dla.mil.

Sincerely,

KOLONCHUK.RAYMOND.L.JR.1230207093
